

Date	30 September 2026
Team ID	SWTID-2026-7220
Project Name	import data using transform maps(spreadsheet)
Maximum Marks	4 Marks

Project Design Phase

Solution Architecture

Solution Architecture:

Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Example - Solution Architecture Diagram:

Figure 1: Architecture and data flow of the Spreadsheet Import System using Transform Maps
